Special new offer for 2012!

We have recently partnered up with the Conservation Agriculture & No-Till Farming Association (CANFA) to bring our members a special offer for 2012.

Membership for CWFS as you know is normally $88 per year. Membership for CANFA is normally $75 per year.

In an effort to work together more closely and increase the benefits we can offer you, we are giving you the opportunity to join both organisations for the cost of only $155-50 per year. **This is a saving of 10% on the normal CANFA subscription.**

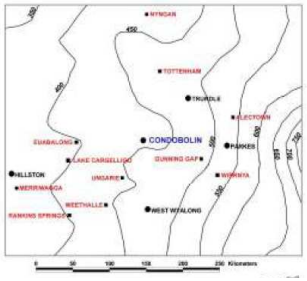
As well as all the great benefits you receive as a CWFS member, you will receive the following benefits as a member of CANFA:

CANFA Member benefits-

- Member e-bulletins addressing the latest conservation agriculture developments
- Access to our dial a friend database service
- Discounts on entry to annual field day and conference, technical workshops, bus trips and other events
- Discounts on CANFA, CAAANZ and other publications
- Regular member emails

Central West Farming Systems (CWFS)

CWFS is a membership based, farmer driven, not for profit organisation. We receive Government and Industry grants to undertake research and extension activities for our members. We operate 11 regional sites across the low rainfall central west region. These sites allow our members to set the direction of these activities annually through pre-season meetings, crop walks and spring field days.



Membership

Membership of CWFS costs only $80 (GST Excl.) per year and offers the following benefits:

- Involvement in our regional site program and the opportunity to set our research direction
- Annual Research Compendium including all CWFS trial results
- 4 newsletters annually
- Regular fact sheets and email bulletins
- Free or discounted entry to all field days, workshops and extension activities
- Access to members only section on the CWFS webpage www.cwfs.org.au

Most importantly, only with a strong membership are we able to attract funding and resources, your own levy dollars, into our local region for research and extension activities.
